

# Accelerating Fuel Cell Mobility with Turnkey Storage Solutions

Engineering Complete, Vehicle-  
Ready Hydrogen Storage Systems  
from Concept to Integration

## End-to-End Capability for OEMs

### System Design Engineering

Custom solutions tailored to your vehicle's chassis,  
range requirements and safety protocols

### Safety & Control System

Inclusion of necessary sensors, PRDs, and  
monitoring interfaces.

### Neck Mounting

The proprietary neck mounting technology  
significantly reduces system weight and simplifies  
operation and maintenance

### Light Frame Design

Light riveted frame design ensures strong vibrance  
resistance, modularity and low maintenance

## Applications

### Specialized Vehicles

Optimized solutions for short-  
and medium haul cold chain  
logistics; utility vehicles

### Trucks

For logistics and delivery,  
mining, port operations

### Buses

Longitudinal roof  
mounting of the hydrogen  
fuel storage system
